09-cv-1410 (KAM)(RLM)

As we discussed in our telephone conversation yesterday, Elizabeth Davis has found a data entry error in her original report. I have enclosed her revised report that corrects the error. I describe below the main revisions to the report. The bottom line effect of the changes is to reduce Ms. Davis' calculation of damages from \$21,699,975 to \$20,089,501.

For fiscal years 2007-2009, data for the clerkship weeks provided at St. Johns and Mary Immaculate Hospitals were apparently entered in the original report as having been provided in Massachusetts, rather than in New York. The revised report corrects that entry error.

As a result, the table in Exhibit J was revised as follows:

	2009			2008		
	Core	Elective	Total	Core	Elective	Total
New York						
Revised Exhibit J	18,804	11,035	29,839	17,798	11,444	29,242
Original Exhibit J	13,981	6,405	20,386	13,486	6,150	19,636
Massachusetts						
Revised Exhibit J	318	44	362	302	45	347
Original Exhibit J	5,141	4,674	9,815	4,614	5,339	9,953

Correction of this entry error also changes the Summary of Average Weekly Rates Paid by Ross for Clerkships as reflected in Exhibit N as follows:

	Core			Elective		
New York State	2009	2008	2007	2009	2008	2007
Revised Exhibit N	343.66	318.25	281.16	307.75	289.75	258.82
Original Exhibit N	350.13	316.08	278.65	294.76	258.49	253.24

Correction of the entry error changes the weighted average rate for fiscal year 2008 shown on Exhibit O from the \$298.35 in the original Exhibit O to \$307.19 as shown in the revised Exhibit O. As a result of the revision in 2008 weighted average rate, the 3 year Compound Annual Growth Rate calculated in Exhibit O has been revised from 8.65% to 7.60%.

The calculation of Total Present Value of Replacement Clerkships using the 7.60% Compound Annual Growth Rate is reflected in revised Exhibit D. The revision reduces that sum from \$14,319,208 to \$12,738,735 and, thus, the total damages calculation to \$20,089,501.

Best regards,

George J. Tzanetopoulos
